PROJECTS

AI-Based Digital Addiction Risk Analyzer *Python, Pandas, NumPy, Scikit-learn*

- Built a classification model that predicts digital addiction risk from behavioral data (39714 records, 25 features).
- Cleaned and preprocessed data, performed feature selection and compared Logistic Regression, Random Forest, XGBoost, SVM, best model reached 89.67% accuracy.
- Validated with train/test split and cross-validation to confirm reliability and avoid overfitting.

Online Railway Reservation System *HTML, CSS, JavaScript, Bootstrap, PHP, MySQL*

GitHub: github.com/mirali02/project

- Developed a full-stack reservation system with user registration/login, train search, ticket booking and cancellation.
- Designed a normalized MySQL database with tables and implemented CRUD operations in PHP, including admin panel / seat availability / PNR search / Employee panel/
- Built a responsive Bootstrap interface that works across mobile and desktop.
